EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Quadeer A. Ahmed on July 13, 2009.

The application has been amended as follows:

In claim 1, part (e), line 1, the word "bottom" has been changed to "bottoms". In line 2 of part (e), the word "path" has been changed to "paths".

In claim 5, line 2, the word "and" has been changed to "or".

In claim 12, line 2, "analogue" and "and" have been changed to "analogues" and "or" respectively.

In claim 13, line 2, "an outlet valve, which is" has been changed to "outlet valves, which are".

In claim 15, line 3, "bottom" and "container" have been changed to "bottoms" and "containers" respectively.

In claim 16, line 2, "container itself" has been changed to "containers".

Claim 19 has been canceled.

In the abstract, the word "by" in line 1 has been changed to "from encapsulated" and "encapsulation" in line 2 has been deleted. The comma in line 4 has been deleted. The word "integration" in line 7 has been changed to "disintegration."

In the specification, the label for a perforated mesh on page 4, lines 23-24 has been changed from "(8)" to "(8a)." The label for funnel like inlets in line 27 of the same page has been changed from "(8)" to "(8b)." The phrase "are provided" are added to line 27 to make a complete sentence.

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: In Fig. 2, "7d" at the top of the figure has been changed to "7b". The label "8" on the left of the left cylinder has been changed to "8a" and the "8" on the right to "8b" corresponding to the changes made in the specification. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Allowable Subject Matter

2. Claims 1-5, 7-10, 12-16, 18, 20-24, and 26 have been found to be allowable over the prior art of record.
3. The following is an examiner's statement of reasons for allowance:
4. The claims are novel over the closest prior art. The closest prior art is US 5,817,157 to Checketts.

Checketts also discloses a system for the production, storage, and dispensation of hydrogen, but does not teach many elements in the system including: at least a pair of sealed and replaceable cylinders, rotatable containers fixed to inner surface of the cylinder on both the sides by supporting rings with rollers, a slide base member fixed to the inner surface of the cylinder on both sides by supporting rings, a plurality of baffles

disposed both inside and outside periphery of the rotatable container, and finally, motion transmitting elements mounted on the ramming members and connected to the outer baffles to provide corresponding roatable action to the containers. It would not have been obvious to include all the specified elements into the system of Checketts; therefore, the claims are novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to HENG M. CHAN whose telephone number is (571)270-5859. The examiner can normally be reached on Monday to Friday, 8:00 am EST to 5:30 pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jerry Lorengo can be reached on (571)272-1233. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
